DETAILED ACTION

Response to Amendment

By amendment filed 12/15/2005, claim 7 is amended and claim 14 added. The abstract is amended, and the replacement sheet of drawings is received. The replacement sheet of drawings and the abstract are acceptable, and claims 7-14 are pending and allowed.

Allowable Subject Matter

Claims 7-14 are allowed. The following is an examiner's statement of reasons for allowance:

There is not disclosed a method of making a laser as claimed where the active layer is disordered by diffusing an impurity at least through the impurity supply control layer at least in the predetermined region, wherein the concentration of the impurity diffused in the etch stop layer in the predetermined region is greater than a concentration outside the predetermined region and less than or equal to $2 \times 10^{18} \text{ cm}^{-3}$.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

Applicant's arguments filed 12/15/2005 have been fully considered and are persuasive. Namely, it is persuasive that claim 7 as amended can no longer be read on by the Ono (US

5,737,351) reference because in Ono the impurity is not diffused through an impurity supply control layer in the predetermined region. There is no suggestion to modify Ono to reach this limitation since the alleged impurity supply control layer of Ono is specifically not included over the portion that corresponds to the claimed predetermined region.
